## PROCEEDINGS

155<sup>th</sup> Meeting of Expert Committee (EC) for Appraisal of Applications for Import/Export of hazardous and other wastes with reference to Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016 as amended from time to time held on 23<sup>rd</sup> April, 2026 in Online Mode under the chairmanship of Shri Sudhir Srivastava.

**Opening Remarks of the Chairman:** The Chairman extended welcome to members and other participants and requested to start the proceeding as per the agenda adopted for this meeting.

### **Initial Discussion:**

- (i) The discussion commenced with joining of the meeting by Dr. R. P. Joshi, Additional Director General Health Services (ADGHS) along with Dr. Rupali Roy, Assistant Director-General, Directorate General Health Services (DGHS), Ministry of Health and Family Welfare (MoH&FW).
- (ii) During the deliberation, Committee was informed that issue of permitting import of used/refurbished High-End High-Value (HEHV) Medical Equipment, particularly with regard to adopting an age-based criterion versus a residual life-based approach was earlier discussed in detail in the Committee meetings based on the list of used/refurbished HEHV medical equipment received from DGHS, MoH&FW along with certain terms and conditions inter-alia “*Only HEHV medical equipment used for less than or up to 5 years from date of manufacture should be allowed for import*”.
- (iii) The EC was in general agreement with the conditions suggested by DGHS, MoH&WF. The committee noted that as per the extant O.M. dated 15<sup>th</sup> October, 2024, the import of used/refurbished high end high value medical equipment is permitted , inter-alia on the following condition:  
  
*“The High End High Value Used/refurbished Medical Devices having residual life of minimum 07 years, duly certified by a Chartered Engineer or a Certificate from any accredited agency of exporting country indicating the functionality, manufacturing date, residual life and serial number, shall be allowed for import for reuse purpose”.*
- (iv) Further, EC felt that HEHV medical equipment usually has a life of up to 15 years and even in developed countries, equipment less than 5-year-old would be replaced infrequently. Therefore, it may be more practical to allow equipment based on their residual life. Accordingly, Committee has been following a practice of allowing imports based on a minimum residual life of 07 years, supported by documentary evidence such as Chartered Engineer or equivalent Certificate issued by the exporting

Country, service history, quality assurance reports, and de-installation/decommissioning reports of used/refurbished HEHV medical equipment. In respect of third party supplies, the committee has also been ascertaining, to the extent feasible, the arrangements for the availability of skilled manpower and spares. The committee has also obtained, on a sample basis, feedback from the actual users. The committee has noted that a tie up with OEM gives a stronger assurance of quality and after sales service, and while conscious of the cost implications, has advised third party importers to explore such tie ups expeditiously.

(v) The concerns about the age of import of used/refurbished HEHV medical equipment was again discussed in EC meeting held in December, 2025 in presence of CDSCO representative. After detailed deliberation, keeping in mind the views of DGHS, MoH&FW received earlier and views of CDSCO representative during the meeting, the committee decided to follow the following for considering import application w.r.t. HEHV used/re-furbished medical equipment henceforth:

- Only those equipment which are less than 5 years old i.e., for the current FY 2025, only HEHV used/refurbished medical equipment with manufacturing year 2020 and onwards with minimum residual life of 7 years is consider for import recommendation.
- As regards the equipment more than 5 years old, the details of each individual piece of equipment, such as maintenance history, latest annual quality review report, compliance with applicable standards, decommissioning reports, compliance with refurbishment standards *etc.* may be referred to the CDSCO representative for further views.

*In view of the above, details of used/refurbished HEHV medical equipment more than 5 years old were referred to CDSO for their comments.,*

(vi) CDSCO vide email dated 16.04.2026 has stated that “*the Experts Committee of MoEFCC is reviewing the proposal with respect to the environment protection. The CDSCO mandate is to ensure the quality, safety and performance of medical devices by review of technical documents under Medical Device Rules, 2017 in the perspective of patient/healthcare safety.*

*Therefore, the CDSCO has no comments to offer on the recommendation of Experts Committee of MoEFCC.’.*

(vii) In view of the comments received from CDSCO, and representation received from Intuitive Surgical India Pvt Ltd requesting to consider the import permission for used/refurbished HEHV medical equipment older than 5 years, as per earlier practice and due submission of documents Form-5, Import Justification, CE Certificate for conformance of each serial no, after sale service etc, EC review the decision taken during December, 2025 in the presence of representatives of DGHS, MoH&FW.

(viii) Dr. R.P. Joshi, Additional DGHS, DGHS, MoH&FW gave a brief overview of the O.M. dated 20.08.2024 of DGHS, MOH&FW forwarding revised list of refurbished HEHV medical equipment and terms & conditions for allowing their import.

- (ix) Copy of Chartered Engineer or equivalent Certificate issued by the exporting Country, service history, quality assurance reports, and de-installation/ decommissioning reports of used/refurbished HEHV medical equipment, and assessment of availability of after sales service, qualified service personnel and spares availability of a few sample cases were shared on the screen before the committee.
- (x) After going through the documents accompanying a few sample cases which were shared on the screen and discussions with a couple of applicants, Additional DGHS acknowledged and appreciated that the Committee has adopted robust safeguards by way of submission and scrutiny of the aforesaid details/documents before making recommendation.
- (xi) After discussion, Additional DGHS was of the view that, EC may continue with the MoEF&CC O.M. dated 15.10.2024 issued based on the O.M. dated 20.08.2024 of DGHS, MOH&F specifying the terms and conditions for allowing import of used/refurbished HEHV medical equipment.
- (xii) After detailed discussion on the subject the Committee observed the following:
- There exists a well-established global market for used/refurbished medical equipment, including OEM-certified refurbishment with defined quality protocols.
  - The current system of detailed documentation and certification provides a reasonable level of assurance regarding functionality and safety.
  - A strict age restriction may limit availability and increase cost, affecting accessibility of such equipment.
  - The committee noted that in the case of equipment such as CT scanners, which use X-rays, a license is also required from AERB, which carries out an initial post installation quality check, followed by periodic quality assurance checks.
  - There is a need to adopt a balanced approach between ensuring affordability and maintaining safety, quality, and technological relevance.

**In view of the above deliberations, the EC was of the view that the existing residual life-based approach, supported by prescribed safeguards, may be continued at present and the matter may be revisited based upon post installation performance assessment and upon receipt of further policy guidance from the DGHS, MoH&FW. EC was also of the view that cases earlier referred to CDSCO will be reconsidered as per the above discussions.**

**Based on the above deliberation, EC consider the applications w.r.t. import of used/refurbished HEHV medical equipment in the present meeting.**

**Consideration of Proposals:** The EC considered the proposals as per agenda adopted for the meeting. The details of deliberations held and decisions taken in the meeting are as under:
